Osteoporosis
Society**

Presentations on Osteoporosis, Men's & Women's Health & Exercise

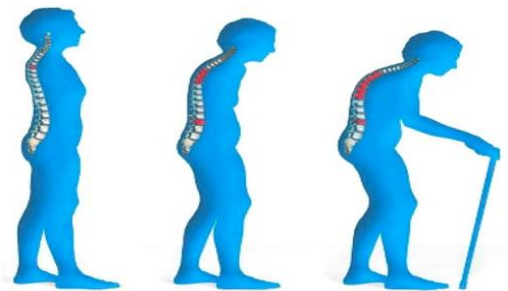

Did you know that people in their 90's have improved their bone health?
Did you know that all women lose bone going through and 10 years post menopause?
Did you know that there are approximately 200 causes of bone loss, stress being just one?
Did you know that 50% of women and 25% of men will lose excessive bone?
Did you know that 75% of people with incontinence can resolve this issue?
Did you know that those with bone loss should be individually assessed for exercise?
